In this document, I provide student evaluations for when I was the Teaching Assistant for Graduate Microeconomics II. The official evaluation the EUI runs for each course assesses the instructor and the teaching assistant together, so to make the feedback on my own teaching easy to read, I have collected here the quantitative items and open comments that concern my role as TA. The complete and unedited evaluation report for each course is attached at the end for reference.

Microeconomics 2

David Levine, 2021–2022
Sole Teaching Assistant

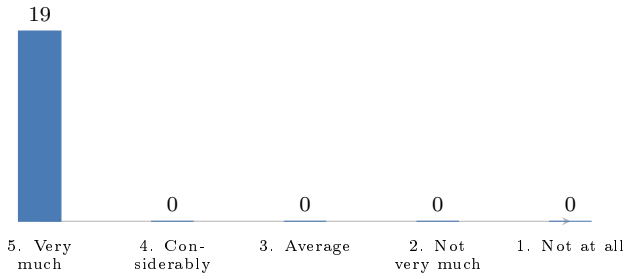

Q18. Do you think the teaching assistant (Doctoral Researcher or Post-Doctoral Fellow) was well organised and prepared?

Q20. Please provide your open comments and feedback in relation to individual teaching assistants (please specify the teaching assistant):

> Tuna was excellent. Her notes were very helpful, and explained all the concepts in great detail. Problem set solutions were all highly clear and well-written. Seminars were good, but I feel a lot of people didn't attend as they had to focus on other courses as this one is the easiest this block, but this should not be taken as something negative against Tuna.

> Very helpful, great notes and resources, kind and available.

> Tuna did an exceptional job. She was always approachable and flexible. She also provided a set of notes to complement lectures, which were central to my understanding of the subject matter. She went beyond what I would expect from a TA!

The TA gave excellent individualized feedback on PS submissions.

Tuna was a great TA. Top of the class!

I absolutely loved Tuna's approach and the way she explained the problems. She was incredibly available for one-to-one sessions outside office hours. Super helpful! So far the best TA we have had.

Tuna knows her subject very well and is highly prepared. Her TA sessions were very clear and of great help.

Tuna is an amazing Teaching Assistant, she closely followed the pace of the class to make sure her classes were always relevant for the material touched in the lectures. She is always available, and willing to help.

Tuna was a superb TA!

Tuna Dokmeci, the teaching assistant of this course, did a brilliant job for this class. Basically, she carried the most of the weight of this class as she provided detailed lecture notes and was accesible any time a student had a question about the topics that were covered. Without her teaching, all the students would have to work four times more for this class.

Q35. Written notes and references: additional comments

Tuna's notes.

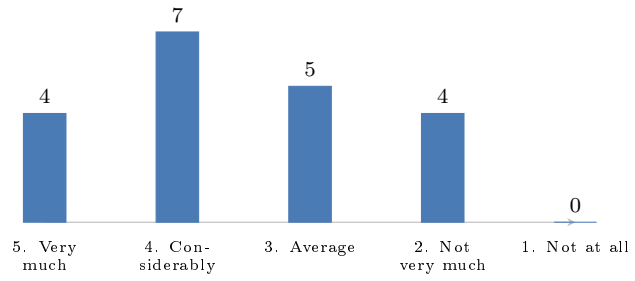

[...] Tuna's notes by contrast were very clear and central to my understanding.

[...] the notes provided by the TA are amazing.

Q17. Please provide your open comments and feedback in relation to individual professor co-teaching the course.

Response: Levine's lectures are very good and interesting, but not very relevant for the final exam. Therefore, I found myself not attending a lot despite the fact that I found the topics interesting, as my sole focus this year is to pass the exams.

Response: Pr. Levine teaches this class with great enthusiasm. By moment the lectures seem a bit disconnected from the problem sets and content of the TA sessions. But even though, just listening to David Levine talk about game theory is highly intersting.

Response: Professor Levine is an enthusiast lecturer, however, lectures get a bit hard to follow given that slides don't include much information, and so it sometimes gets difficult to relate the concepts and make the bridge between slides and lecture.

Q21. In your opinion, what topics were omitted that should have been included?
Response: Maybe more Bayesian

Q22. What topics should have been reduced/omitted?
Response: None
Response: Decision under uncertainty

Q23. What topics covered in the course/seminar did you find particularly valuable?
Response: Games with asymmetrical information
Response: Decision Theory, self-confirming equilibrium
Response: discussion of behavioural "challenges" to microeconomic theory in a critical manner
Response: Game Theory concepts
Response: Signalling games
Response: Bayesian games
Response: Bayesian games
Response: Self confirming equilibrium, Bayesian Games

Q24. How could the teaching format and learning results for this course be improved?
Response: More informative and process-oriented notes on slides; more clear applications to real life
Response: The structure was not always clear. Especially the decision theory part and dynamic programming aspects were allocated very little time and it was not immediately clear how they were linked to the remaining material. However, I found the insights to be very valuable.
Response: Slight update in the lecture slides
Response: Better overlap between lectures and problem sets.
Response: Increase the number of exercises during Levine's course
Response: The professor's could be a bit more detailed

Q25. Do you have any further comments about the course/seminar?
Response: Prof Levine could reference his book "Is behavioral economics doomed?" as a supplementary reading for the decision theory part / behavioral challenges, as this outline complementing the slides helped my understanding a lot.Response: Response: Response: Response: Response: Response: Response: Response: Response: I did not find it fair that cameras were not required for people sitting the exam on-line. People in class were under 'control', while people who sat an exam at home were not. Some of them were at the same place together when sitting an exam which of course allowed communication. Also, in class we had exactly 3 hours, while at home you could use at least 3 hours and 20 minutes since we had 30 minutes for submission.

Course content

Q26. Was the sequence and structure of the course clear?

Q27. How much overlap was there between this seminar/course and a previous one you took in your previous MA programme?			
5	Almost identical	2	10.00%
4	Considerably	10	50.00%
3	Not very much	6	30.00%
2	Not at all	2	10.00%
1	I do not have an MA degree prior to EUI	0	0.00%
	NA / No Answer	0	0.00%

Q28. Course content: additional comments:
Response: Overlap was there. The game theoretic aspect could have been developed with slightly more emphasis and continuity in notation / formal things.

Written Notes and References

Q29. Were slide/lecture notes provided to you?		
Yes	20	100.00%
No	0	0.00%
NA / No Answer	0	0.00%

Q30. Were the slide/lecture notes clear?
